

INCIDENT MANAGEMENT SITUATION REPORT
 FRIDAY, JANUARY 12, 2001 - 1000 MST
 NATIONAL PREPAREDNESS LEVEL I

CURRENT SITUATION:

One new large fire was reported this past week in the Southern Area, and one large fire in Southern California reached containment status. Initial attack activity was light in the Southern Area despite red flag conditions the first part of the week. A weak low pressure system drifted across Florida easing the fire potential in the area. An intense Pacific storm brought much needed precipitation to Southern California with some areas reporting over four inches of rain in a 24 hour period.

SOUTHERN CALIFORNIA LARGE FIRES:

DUBOISE	FL	FLS	255	100	---	11	0	4	0	0	NR	NR

FLS = Florida Division of Forestry

OUTLOOK:

The persistent high pressure over the Rocky Mountains will finally weaken today. This will allow low pressure from the Pacific Northwest to move slowly over the mountains bringing snow showers to the region. Winter storm warnings are posted for mountainous areas of the West, with possible snow accumulations of six to 16 inches. Heavy surf, high winds, and coastal flooding are expected for Southern California. Daytime high temperatures will range from the upper 20's in the northern portion of the region to the upper 50's in California.

A weak low pressure system will move into eastern Minnesota, which will be strong enough to produce rain and snow showers for the Midwest. High pressure continues to build over eastern Texas, but will be pushed northeast this afternoon from the approaching Pacific weather systems. High temperatures across the northern Great Plains will be in the 30's and 40's, while in the southern portions of the Midwest the temperatures will

be in the 40's and 50's.

The extreme Southeast should expect scattered rain showers by this afternoon. Snow showers are forecasted for the southern Appalachians and rain showers from the Great Lakes to southern Florida. The lower Mississippi Valley will have clear skies due to high pressure moving into the area. Across the South daytime high temperatures will be mainly in the 40's and 50's, with the 60's and 70's in Florida.

High pressure from Canada is settling over the Northeast keeping the region dry today. Cooler temperatures, increasing winds and scattered snow showers are expected to move into the area late Saturday morning. High temperatures will be in the 20's and 30's.
